

SHARON P

MERN STACK DEVELOPER

☎ 8129237617 ✉ sharonp.dev.1@gmail.com 🌐 sharonp.pro 🔗 LinkedIn 🏠 Github Profile

PROFESSIONAL SUMMARY

Self-taught MERN Stack Developer with experience building and deploying full-stack web applications. Developed PixelPoint, a production-ready e-commerce platform featuring authentication, payment processing, wallet management, referral rewards, inventory management, and analytics dashboards. Currently expanding my frontend expertise through DevSpace, a React-focused project management platform. Passionate about building scalable software and solving real-world problems through technology.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML, CSS, Bootstrap, Tailwind

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Tools: Git, GitHub, AWS, Render, Vercel, Postman

Concepts: JWT, OAuth, REST APIs, SSR, MVC, Aggregation, Cron Jobs

PROJECTS

🔗 pixelpoint.sharonp.pro

PIXELPOINT - FULL STACK E-COMMERCE PLATFORM

- Built a production-ready e-commerce platform for new and refurbished laptops with separate user and admin interfaces.
- Developed secure authentication using Express sessions, cookies, Google OAuth, and OTP-based verification.
- Implemented product variants, inventory management, cart, wishlist, and order management workflows.
- Integrated Razorpay payment gateway with payment retry and recovery mechanisms.
- Designed wallet, referral reward, coupon, and offer management systems.
- Managed product and brand image uploads using Cloudinary for scalable cloud-based media storage.
- Built return request handling, refund processing, and automated wallet credit workflows.
- Developed admin dashboards featuring sales analytics, reports, product management, and PDF exports.
- Implemented scheduled tasks for offer expiration and business rule automation using cron jobs.
- Deployed and maintained the application in a production environment.

Tech:

Node.js, Express.js, MongoDB, EJS, Bootstrap, Razorpay, Google OAuth, Cloudinary, AWS/Render

- Building a project management platform designed to centralize tasks, notes, project planning, and activity tracking for developers.
- Implementing Kanban boards with drag-and-drop workflows.
- Creating project workspaces combining tasks, notes, documentation and activity tracking.
- Using Context API, Custom Hooks and React Router.

Tech:

React, Node.js, Express, MongoDB

EDUCATION

- MERN Stack Development Bootcamp
Brototype
 - Higher Secondary (Computer Science)
St. Michael's A.I.H.S.S, Kannur
-
