

SHARON P

JUNIOR SOFTWARE DEVELOPER

📞 8129237617 ✉️ sharonp.dev.1@gmail.com 🌐 sharonp.pro  [Linkedin](#)  [Github Profile](#)

PROFESSIONAL SUMMARY

Junior Software Developer with hands-on experience building and deploying full-stack applications. Built PixelPoint, a full-stack e-commerce platform, and currently developing DevSpace with React and TypeScript while expanding into Android development through DevTasks using Kotlin and Jetpack Compose. Strong foundation in JavaScript, Node.js, React, and MongoDB with a practical approach to learning new technologies.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML, CSS, Bootstrap, Tailwind

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Mongoose

Mobile: Kotlin, Android, Jetpack Compose, Retrofit

Tools: Git, GitHub, AWS, Render, Vercel, Postman, Cloudinary

PROJECTS

 pixelpoint.sharonp.pro

PIXELPOINT - FULL STACK E-COMMERCE PLATFORM

- Built and deployed a full-stack e-commerce platform for new and refurbished laptops with separate user and admin interfaces.
- Implemented authentication using Express sessions, cookies, Google OAuth, and OTP-based verification.
- Developed product variants, inventory, cart, wishlist, coupon, offer, and order management workflows.
- Integrated Razorpay payments with payment retry/recovery mechanisms, along with wallet and referral reward systems.
- Built admin dashboards with sales analytics, order reports, product management, PDF exports, and MongoDB aggregation pipelines.
- Implemented Cloudinary media storage, return/refund workflows, automated wallet credits, and scheduled business-rule automation using cron jobs.

Tech Stack:

Node.js, Express.js, MongoDB, EJS, Bootstrap, Razorpay, Google OAuth, Cloudinary, AWS, Render

DEVSPACE - DEVELOPER WORKSPACE PLATFORM (IN PROGRESS)

- Building a project management platform for developers to organize projects, tasks, notes, documentation, and activity.
- Structuring frontend state and application workflows using Context API, custom hooks, and React Router.

Tech Stack:

React, Node.js, Express, TypeScript, MongoDB

DEVTASKS - ANDROID TASK MANAGEMENT APPLICATION

 [Android Repository](#)

- Built an Android task management application using Kotlin and Jetpack Compose.
- Implemented task creation, completion, deletion, progress tracking, and a responsive mobile interface.
- Integrated the Android application with a Node.js and Express.js REST API using Retrofit and JSON.
- Built and connected a MongoDB-backed backend supporting complete task CRUD operations.

Tech Stack:

Kotlin, Android, Jetpack Compose, Retrofit, Node.js, Express.js, MongoDB

EDUCATION

- MERN Stack Development Bootcamp - Brototype
- Higher Secondary (Computer Science)
St. Michael's A.I.H.S.S, Kannur
