

SHARON P

APPLICATION / TECHNICAL SUPPORT

☎ 8129237617 ✉ sharonp.dev.1@gmail.com 🌐 sharonp.pro 🔗 [Linkedin](#) 🏠 [Github Profile](#)

PROFESSIONAL SUMMARY

Entry-level application and product support candidate with hands-on experience building and deploying full-stack applications using JavaScript, Node.js, React, REST APIs, and MongoDB. Experienced across frontend, backend, APIs, databases, authentication, payments, and third-party integrations. Built end-to-end application workflows involving order processing, inventory, refunds, reporting, and admin operations. Familiar with Git, GitHub, Postman, AWS, Vercel, and Cloudinary.

TECHNICAL SKILLS

Application & API: Node.js, Express.js, REST APIs, POSTMAN, JSON

Database: MongoDB, Mongoose, CRUD, MongoDB Aggregation

Web: Javascript, Typescript, React, HTML, CSS, Bootstrap, Tailwind

Authentication & Integrations: Express Sessions, Cookies, Google OAuth, OTP, Razorpay, Cloudinary,JWT

Tools: Git, GitHub, AWS, Render, Vercel

PROJECTS

🔗 pixelpoint.sharonp.pro

PIXELPOINT - FULL STACK E-COMMERCE PLATFORM

- Built and deployed a full-stack e-commerce platform for new and refurbished laptops with separate user and admin interfaces.
- Implemented authentication using Express sessions, cookies, Google OAuth, and OTP-based verification.
- Developed product variants, inventory, cart, wishlist, coupon, offer, and order management workflows.
- Integrated Razorpay payments with payment retry/recovery mechanisms, along with wallet and referral reward systems.
- Built admin dashboards with sales analytics, order reports, product management, PDF exports, and MongoDB aggregation pipelines.
- Implemented Cloudinary media storage, return/refund workflows, automated wallet credits, and scheduled business-rule automation using cron jobs.

Tech Stack:

Node.js, Express.js, MongoDB, EJS, Bootstrap, Razorpay, Google OAuth, Cloudinary, AWS,Render

DEVSPACE - DEVELOPER WORKSPACE PLATFORM (IN PROGRESS) 🔗 <https://devspace.sharonp.pro>

- Building a developer-focused workspace for organizing projects, tasks, notes, and development workflows using React and TypeScript.
- Built the initial frontend with React Router, Context API, custom hooks, reusable components, and responsive UI architecture.
- Implemented JWT-based authentication, protected routes, login/register flows, persistent authentication state, validation, loading states, and error handling.
- Built and deployed the V0.1 application with a Vercel frontend and AWS EC2 backend, using Nginx reverse proxy, HTTPS, PM2, and MongoDB Atlas.

Tech Stack:

React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Axios, AWS EC2, Nginx

DEVTASKS - ANDROID TASK MANAGEMENT APPLICATION

🔗 [Android Repository](#)

- Built an Android task management application using Kotlin and Jetpack Compose.
- Implemented task creation, completion, deletion, progress tracking, and a responsive mobile interface.
- Integrated the Android application with a Node.js and Express.js REST API using Retrofit and JSON.
- Built and connected a MongoDB-backed backend supporting complete task CRUD operations.

Tech Stack:

Kotlin, Android, Jetpack Compose, Retrofit, Node.js, Express.js, MongoDB

EDUCATION

- MERN Stack Development Bootcamp - Brototype
- Higher Secondary (Computer Science)
St. Michael's A.I.H.S.S, Kannur
